WHOLESALE PRICE LIST TO DEALERS

OF

Keystone Vegetable Seeds

For Prompt Order, Immediate Shipment

— FROM —

CORNELI SEED COMPANY

LIST 483 — WHOLESALE SEEDSMEN — MISSOURI PERMIT No. 2

General Offices: 101 CHOUTEAU AVE., ST. LOUIS 2, MO.

NOTICE. We give no warranty express or implied as to the productiveness of any seeds, bulbs or plants we sell and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seed. Quotations subject to market fluctuations and unsold.

CORNELI'S STANDARDIZED PACKAGE PLAN

To give you quicker service and to assure accuracy in filling your orders, we have adopted standard bag sizes for each kind of seed. They are based on a study of sizes usually ordered. The Standard Sizes are listed at the top of each price column. We will use the least possible number of packages to fill the quantity ordered of each item.

BAGS

On full bag orders of Beans, Peas, and Corn, bags are supplied at no extra charge. On full bag orders for all other kinds of vegetable seeds, bags will be charged extra and are not returnable.

Except for "Pack Bags", no extra charge will be made for bags with any kind of vegetable seed ordered in less than full bag quantities if the order may be filled with "Standardized", broken bag sizes as shown over each price column.

BEANS (120 lbs. per bag)

Selected—Field Rogued—Hand Picked

Bush, Green Pod

THE KEYSTONE

Seedsmen

CORNELI SEED CO. • ST. LOUIS 2, MO.

HOW CORNELI SHIPS TODAY'S ORDERS TODAY as told in May 3 SEED WORLD

Here's the inside story of Corneli's speed-up system of filling orders the same day they are received.

You will enjoy reading your enclosed copy of this feature article as it appears in the current issue of THE SEED WORLD.

NOTE THE NET RESULT OF CORNELI'S STANDARDIZED PREPACKAGING PLAN

1. It speeds up fill-in shipments, enabling Corneli to ship your orders the same day they are received.
2. It helps you as a KEYSTONE SEED dealer to comply with all seed laws.
3. It provides you as a KEYSTONE SEED dealer with sealed bags for resale to your commercial growers.

Won't you please use the enclosed order blank to send us your order for fill-ins?

Let us prove to you that

"CORNELI SHIPS TODAY'S ORDERS TODAY!"

Sincerely,

CORNELI SEED COMPANY

JEB:WG

NOTED BY

Assembling the seed order. Note the little desk which is part of the assembly cart and the well lighted sturdy metal bins.

To Meet Changing Conditions
Corneli Seed Company
Inaugurates A

Standardized Prepackaging Plan

By K. A. Metzger

HERE IS THE inside story of how conditions brought on by World War II made possible Corneli's Speed-up system of filling orders the same day they are received. Just a few minutes with Earl Page, the company's energetic president, convinces one that here is a company not content to rest on its laurels or remain static in the face of changing conditions.

Even though Corneli Seed Co., St. Louis, Mo., "Seeds since 1845," prides itself on being the "Oldest Seed House West of the Mississippi," Mr. Page believes in keeping abreast of the needs of the times.

"Bruce Barton, well known author and advertising man, once said, 'When you are through changing, you're through,'" commented Mr. Page, "and I often think of that when we are faced with new problems brought about by ever changing conditions. Either you face them and solve them, and go forward, or you try to dodge them and find yourself left by the parade.

"World War II," he continued, "forced us to put into operation a revolutionary plan of filling wholesale orders that include broken bag quantities. It is adapted in mail order procedure, but with us it is used solely for filling dealer orders as we sell only at wholesale. As a result of this new system, we are able to ship hundreds of fill-in orders the same day the orders are received. Not only does it permit us to make quick shipment of fill-in orders, but it also enables us to rapidly fill contract orders at the peak of our shipping season."

Standardized Prepackaging Plan

Corneli calls it the Standardized Prepackaging Plan. It was born of necessity during World War II. The company, like most firms, during the War was faced with a man-power shortage when many of its experienced order clerks left for the Army or Navy.

"At this point," said Mr. Page, "we called in two of our most capable and experienced men, Charlie Allen, manager of plant operations, who has been with us 24 years, and Dick Becker, our garden seed foreman, 17 years with Corneli. Full credit goes to these two seedsmen for working out so successfully the details of our new system of expediting shipments."

To make it possible and safe to use inexperienced help and girls to fill orders, Corneli completely revised its order filling department. This was done by installing thousands of feet of steel shelving and steel bins for various sized packages of the numerous varieties of vegetable seed. The prepackaged seeds range from one pound to sixty pounds depending upon kind and variety of seed.

For example, beans, peas and corn, are prepackaged in sizes of 5, 10, 30 and 60 pounds and, of course, full bags. On such kinds as beet, carrot, cantaloupe, cucumber and lettuce, the standardized packages are 1, 2, 5, 10 and 25 pounds and full bags. On some of the higher priced items such as broccoli, brussels sprouts, cauliflower, onion, pepper and tomato seed, the prepackaging is done in

quarter-pound, 1, 5 and 25 pound sizes and full bags.

How An Order Is Filled

When the order is received in the order-filling department, an experienced order editor examines it carefully for instructions as to special packaging, seed-treating or anything else that may be unusual. Any item on the order that may require special attention is handled accordingly.

Regular orders (those not requiring special handling of any kind) are handed to order-filling clerks called assemblers. The assembler places the order before her on a little table which is part of a four-wheel steel cart she will use to fill the order.

The order is held in place with an ordinary snap. This makes it convenient for the girl to check off and write in the lot numbers as she passes through the aisles assembling the items specified. There is no lost motion or delay because each size of each variety has been packed in multiple runs by experienced men and women and stored in its own compartment on steel shelves.

One of the illustrations shows a section of Corneli's package filling department. Several of these units are in operation all of the time in addition to many Brown automatic filling and sealing machines. Units like the one pictured are used mostly for filling 2 to 10 pound bags.

Semi-automatic fillers are used and each package is checked on Exact-Weight scales. Each package carries a complete laboratory analysis statement with up-to-date germination test. This is real service and quick.

Another illustration shows a group of packages, each carefully marked with weight, kind, variety, lot number and a copy of the laboratory test. Each package is also sealed with either sticker or metal seal, thus enabling "Keystone" dealers to offer sealed packages to their commercial grower customers.

Checking the Order

When assembling of an order is completed, the assembler delivers it to one of several checking and packing benches. She is then ready to return to the order editor for another order to be filled.

An interesting illustration shows one of Corneli's packers checking an order from an assembly cart, and packing the order for shipment. He packs it in the necessary cartons or other shipping containers, and makes a notation of the number of items

being shipped. He next fills in the bill of lading and sends the packed order to the shipping department.

In the shipping department the packages are assembled with any full bags or other items that are included in this particular order, the full bags having been filled in another department.

However, even though most orders for 60 pounds or less are filled by means of this standardized prepackaging plan, Corneli still finds it necessary to have bins and drawers of bulk seed, especially for unusual varieties that are not frequently ordered. A section of bins and drawers in the garden seed department is devoted to bulk seed of varieties that are important, but do not sell in large enough volume to be included in standardized packages.

In putting this plan into practice,

and to make it work advantageously for the customer, it was necessary to enlarge the packaging department, the tag and label department and the printing department, for this plan resulted in a large increase in the number of tags and labels used.

"But it was worth it," comments Earl Page. "With this plan in effect it is possible for girl assemblers to fill many hundreds of orders promptly the day they are received, and it all adds up to the following results:

"It speeds up fill-in shipments enabling us to ship orders the same day they are received.

"The plan helps 'Keystone' dealers to comply with all seed laws.

"It provides 'Keystone' dealers with sealed bags for resale to commercial growers, and this all means increased business and better satisfied customers."

Upper left, one of several semi-automatic package fillers; each filled container is checked on Exact-Weight scales placed directly under spout. Lower left, an assortment of different kinds and sizes included in the prepackaging plan. Upper

right, Here the order is carefully "checked and double checked", then packaged for shipment in the proper container. Lower right, bins and drawers for such bulk seed as may not be in sufficient demand for prepackaging.

Tomato—State Certified

Treated with dry new Improved Ceresan—packed in 1/4-lb. boxes or 1-lb., 5-lb., 25-lb. or 50-lb. sealed cotton bags. Varieties marked "Ga." can be supplied registered with the Georgia Dept. of Entomology for the production of plants in Georgia. Mark such orders "For Georgia plant growing" and let us ship directly to the Georgia consignee so that we may notify Georgia officials and comply with their regulations.
